WARNINGS Read Before Using Your Sega Dreamcast Video Game System

CAUTION
Anyone who uses the Dreamcast should read the operating manual for the software and console before operating them. A responsible adult should read these manuals together with any minors who will use the Dreamcast before the minor uses it.

HEALTH AND EPILEPSY WARNING
Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure.

If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using Sega Dreamcast.

In all cases, parents should monitor the use of video games by their children. If any player experiences dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

To reduce the possibility of such symptoms, the operator must follow these safety precautions at all times when using Dreamcast:
- Sit a minimum of 6.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

OPERATING PRECAUTIONS
To prevent personal injury, property damage or malfunction:
- Before removing disc, be sure it has stopped spinning.
- The Sega Dreamcast GD-ROM disc is intended for use exclusively on the Sega Dreamcast video game system. Do not use this disc in anything other than a Dreamcast console, especially not in a CD player.
- Do not allow fingerprints or dirt on either side of the disc.
- Avoid bending the disc. Do not touch, smudge or scratch its surface.
- Do not modify or enlarge the center hole of the disc or use a disc that is cracked, modified or repaired with adhesive tape.
- Do not write on or apply anything to either side of the disc.
- Store the disc in its original case and do not expose it to high temperature and humidity.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.
- Use lens cleaner and a soft dry cloth to clean disc, wiping gently from the center to the edge. Never use chemicals such as benzene and paint thinner to clean disc.

PROJECTION TELEVISION WARNING
Still pictures or images may cause permanent picture tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

SEGA DREAMCAST VIDEO GAME USE
This GD-ROM can only be used with the Sega Dreamcast video game system. Do not attempt to play this GD-ROM on any other CD player; doing so may damage the headphones and/or speakers. This game is licensed for home play on the Sega Dreamcast video game system only. Unauthorized copying, reproduction, rental, public performance of this game is a violation of applicable laws. CONTENTS

Game File — 8 Blocks Required

Outtrigger requires the use of a memory card to save/load game data. For details on saving and loading, see p 18.

While saving or loading, never turn the Dreamcast power OFF, attempt to remove the memory card or disconnect the controller containing the memory card.

STORY

In response to a series of high casualty terroist attacks to its military research facilities, Visitaria, a multinational corporation involved with military and space industries, established training facilities to prepare members for entry into an elite unit known as the International Counter-terrorism Special Force. Handpicked from various special forces groups from around the world, the first squad of highly trained, male and female soldiers are set to begin a harsh and violent program designed to transform them into the world's ultimate counter-terrorism weapon.

As a member of this squad, your goal is to vie for supremacy among your fellow trainees. Utilize the various weapons at your disposal while learning to capitalize on your strengths and minimize your weaknesses in the various missions available. Get to know your opponents and master the techniques required to dispose of them quickly and effectively in the versus mode. Then go online and use every ounce of your cunning and tactical experience to exert your dominance on the Outtrigger network.

STARTING A GAME

Load the Outtrigger game disc into your Dreamcast and turn the power ON. If you haven't already inserted a memory card into an expansion socket of any controller(s) connected to Control Ports A, B, C or D, you will be requested to do so.

If more than one memory card, or previously created Outtrigger game file is available, use ⬆ ⬇ ⬅ ➡ to designate which game file to load. Once the selected memory card and/or file is verified, the game will load. Press the Start Button to proceed to the title screen.
SAVING & LOADING

Each Outtrigger game file requires 8 free memory blocks to save. In general, saving and loading of game data will occur automatically to the file designated at the start of gameplay. For details on saving or loading data manually, see p. 18.

MAIN MENU

From the title screen, press the Start Button to display the mode selection screen. Use ⬆ ⬇ to select a game mode and press Ⓐ to enter. For details on the modes available, refer to the corresponding page numbers listed here.
CAUTION

Never touch the controller Analog Thumb Pad or the Triggers Ⓛ/Ⓡ while turning the Dreamcast power ON. Doing so may disrupt the controller initialization procedure and result in malfunction.
BASIC CONTROLS

Outtrigger is a one to four player game OFFLINE (and 1-6 players ONLINE) that can be played using either the Dreamcast Controller or Keyboard as a main device. Connect the device to be used by each player to a corresponding Control Port A, B, C or D.

A sub-device (such as the Dreamcast Mouse, etc.) can also be used to play, however doing so reqires the use of two ports for each player (one port for the main device and one for the sub). See the following diagrams for examples on device setup:

1 player using both main & sub-device		2 players each using one main device	
Port A	Port B	Port A	Port B

2 players each using both a main & sub-device.			
Port A	Port B	Port C	Port D

3 players: P1 using both a main & sub-device, P2 and P3 each using a main device only
